Tasmania suffered badly under past hung parliaments and minority governments.

Development was lost and investment dried up. Unemployment was high, young people were leaving and families were packing up and heading for the mainland, and the property market was a basket case.

We don't want that to happen again.

Today, we head the growth table for the nation. The State has never been more prosperous.

Ensure Tasmania's future stays bright.

On 18 March, vote for strong, stable majority government.
